**Richard Box : Richard Box's Flowers for Embroidery: A Step-By-Step Approach** before purchasing it in order to gage whether or not it would be worth my time, and all praised Richard Box's Flowers for Embroidery: A Step-By-Step Approach:

Richard Box paints directly from nature, taking photographs to act as aide-memoires and then using collage and hand and machine embroidery techniques. Here he invites all embroiderers, including beginners, to create a collection of flower embroideries featuring roses, honeysuckle, poppies, delphiniums, hedgerow flowers and other favourites. The reader is taken through the various techniques step by step, with colour photographs illustrating the different stages.
