Simon Bolton : Scratch-Building Model Railway Tank Locomotives: The Tilbury 4-4-2 before purchasing it in order to gauge whether or not it would be worth my time, and all praised Scratch-Building Model Railway Tank Locomotives: The Tilbury 4-4-2:

This fascinating volume tells you everything you need to know about how to build an 00 gauge Tilbury Tank locomotive or, indeed, any similar type of tank. This new work is a worthy successor to the author's first book, Scratch-Building Model Railway Locomotives, which was short-listed for the Ian Allan Railway Book of the Year Awards in 2014. Containing scale diagrams, step-by-step photos, sketches and specially commissioned artwork, the book

celebrates the history of Tilbury Tanks and demonstrates a range of different techniques that will prove invaluable in constructing models of these charismatic little locomotives. If you have not yet taken the plunge and begun scratch-building, or if you want to complement your growing scratch-building skills and knowledge, this is the book for you.

About the Author Simon Bolton became a modeller as soon as he was old enough to follow the step-by-step guides in his father's railway modelling magazines. He was inspired to start scratch-building after reading stories about wonderful Great Western locomotives, many of which were not available as models in kit form. Moved to build models of his own, he acquired the necessary skills from journals, railway modelling club members and by trial and error. Now an accomplished modeller, Simon has published articles in the model railway press and society journals, his locomotives have appeared at the Gauge O Guild Annual Exhibition, and he has been an active layout operator and skills demonstrator for the Model Railway Club.
