Michelle Lipson : Sew a Dinosaur: 21 Playful Prehistoric Beasts to Follow You Home before purchasing it in order to gage whether or not it would be worth my time, and all praised Sew a Dinosaur: 21 Playful Prehistoric Beasts to Follow You Home:

1 of 1 people found the following review helpful. Always A FavoriteBy RoxannI used to check this book out from my local library all the time, and finally bought a copy for myself when I moved away for college. I tend to make most of the dinosaurs at 1/2-3/4 the scale the book suggests, so they're easier for little hands to pick up and play with. I even made a small ankylosaurus out of canvas (with reinforced seams, and squeakers in the "ball" of the tail and head) for my dog. So far, my favorite is the pterodactyl shown on the cover, but everyone who's received a dinosaur as a gift has absolutely loved it.If you like to sew things that put a smile of delight and excitement on a little face (or like to see the same look on a grown-up), this is the book for you. :)0 of 0 people found the following review helpful. Great BookBy CustomerI love to make costumes and was asked to make a lizard costume this year. I can usually design my own but I was having a bit of a difficult time with the head and face. I saw this book and thought Aaaa Haaa, Lizards and dinosuars look simular so if I can get a basic pattern for the head I am good to go. This book is chalked full of various crafting dino's from shirts to a a Triceratops costume. I used the pattern lay out from the triceratops, shortend the nose and took off the frill. I also was able to adapt another pattern for a stuffed toy to help with this process. If you like dinosaurs and crafting then you will love this book.0 of 0 people found the following review helpful. The patterns can be enlarged to any size you like without any distortionBy elizabeth n.I owned a copy of this book years ago, then lost it in a move, so I am ecstatic to have found it again! The patterns can be enlarged to any size you like without any

distortion, and the instructions are very clear. Frankly, even someone with only a little sewing experience could make these stuffed dinos.
