However my caveat emptor would be...the directions and details are scant.The majority of the 16 projects don't even show the inside of the bag. On the direction pages for the bags you get a general idea but the images are essentially thumbnails so even then you can't quite tell what's what.I would not recommend for the beginner unless you're highly motivated or are smart enough to jump the information gaps.0 of 0 people found the following review helpful. very helpful. have made several bags already!By
