The pictures are wonderfully made, with enough room for blending but also not sparse enough to be boring. I love that there are 2 of each page so I can try one way with one page and another way with the other page. I have done a couple pages so far, trying pencils with one page and pastels and water color with the other page. The pages can stand water color, if you do not use too much water, and they can stand vaseline. I do not know about terpineol. I hesitate to use that, because if it ruins my page, I will be very upset. I

cannot wait to get another Besties book!! I love them!! LOVE LOVE0 of 0 people found the following review helpful. Love her art workBy wolfLove her art work. Not too busy but very satisfying with each page. I love that there are duplicate pages so I can color one a certain way and color the copy a certain way. It is on great paper and they are printed on one page and the back is blank. I highly recommend her work of art to those that love to color and do not like very busy pages. I have problems with work of art that are really busy and I get very frustrated with that., but this book is so wonderful of not being busy. My husband even loves her work even though he says it is not for men. I told him that men do color these as well. So now he is coloring them now.12 of 14 people found the following review helpful. I love this artist!.....but hate the black ink bleeding!By MaddieAnother so so adorable book to color. I just started coloring about a month or two ago. I have nine coloring books, and three of them are this artist. The pictures of these girls are so much fun to color, and look so awesome when they are done. Makes my new found hobby even better! This is my third and favorite book of this artist. Once again, I have to mention the bleeding of the black ink into the color. I Blame this on the quality of paper and the ink, not the artist, but it's very frustrating. When I use my Prismacolor blender, any black lines that are incorporated into the picture bleed into the color. I've tried everything to avoid it, but it happens all the time, with all three of her books. I use Prismacolor pencils or Marco raffine, but it happens with both when I try to blend with my Prismacolor blender. First I thought it was my blender, until I saw another reviewer post the same problem. Sorry, but I am coming back and removing one star from my review for the frustration and having to spend so much time trying to fix my picture to no avail....
