The best of it's kind!By VestylaProbably the hardest thing to learn in any kind of needlework is shading. This book will walk you right through it and you'll sit around wondering why you thought it was so difficult to begin with. As always, anything from the Royal School of Needlework is worth buying.6 of 6 people found the following review helpful. an excellent addition to the embroiderer's libraryBy OliviaRosethis book contains excellent information in a clear and concise manner. The book size and binding makes it convenient on the work table. I really like the Royal School of Needlework series of books.

Sarah Homfray demonstrates the Royal School of Needlework's approach to the ancient craft of Silk Shading. Learn everything you need about the techniques needed, history of the craft and be inspired by work of the highest standards.

"The stitching is shown in easy-to-follow photographic steps and, through a series of simple exercises, you learn how to shade a vase so that the colours and stitches flow with the shape of the design and also to reproduce more complex shapes, such as a carrot or a banana." *Stitch* (January 2012)
