This ebook was created in order to target hunters and today's young people to approach directly to the wonderful world of nature. Through it and then publish the updates that will try to better describe an art perhaps unknown to many: taxidermy. To help everyone to approach gradually to this art, I have divided this work in most e-book that will publish periodically. A good taxidermist will have, first thing in the artistic vein, enormous patience, a great love for animals and especially not to be an impressionable subject in the work that art entails. Please note: there may be grammatical errors given my poor command with foreign languages (original language: Italian)
