**Carmel D. Morris : The Best Advanced Paper Aircraft Book 2: Gliding, Performance, and Unusual Paper Airplane Models** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Best Advanced Paper Aircraft Book 2: Gliding, Performance, and Unusual Paper Airplane Models:

This is the eagerly-awaited second book in 'The Best Advanced Paper Aircraft' Series - just when you thought it was safe to enter the classroom! First published by Harper Collins (Sydney, London) as 'Advanced Paper Aircraft Mk II' and by Putnam (New York) as 'More Best Paper Aircraft', this new handy-sized paperback edition has all these fun and famous models: Air Hopper Stunt Fly 'Elastokinetic' Sling Shooter Jet Long Nose Glider Hang Glider Thingy Whatsit Glider Loop Glider Stunt Arrow Runway Skimmer Dart Attack Dive Bomber Heliglider Space Shuttle Winged Water Bomber Most of the models are folded, for example, the model on the cover is folded from one sheet, not two - and no cuts. Instructional text and diagrams are well-placed as your folding progresses. Aimed at recalcitrant students, office workers or anyone in need of stress relief, sheer fun or explaining simple flight physics, there is a paper aircraft to suit every purpose! So get folding and start flying and remember; air resistance is futile!
