All of the professional papermakers in my Facebook group say this is the book that got them going in the right direction as well.

This abundantly illustrated, step-by-step guide to one of the oldest of practical arts describes all you need to know about papermaking. Easy to create at home or in the classroom, beautiful handcrafted paper has a multitude of uses from greeting cards, notepaper, and calendars to customized artists' paper and stationery for commercial sale. Author Marna Kern provides a guide to pulp sources (flowers and vegetable matter) and tells how to control molding and drying, sizing and finishing, painting, decorating, and embossing. A definitive work that will appeal to many craftworkers, this book reveals papermaking as an art that is foolproof, inexpensive, and ecologically minded.
