The Complete Book of Sportfishing is an in-depth guide for both the beginner and experienced sportfisherman. It offers a wealth of information about fundamental and successful techniques of fishing - spinning and bait-casting, bait-fishing, coastal and sea-fishing, fly-fishing in varied habitats - as well as a detailed history of the sport, the environment, and the biology of fish. It also tells you how to make your own equipment, and how to handle and prepare fish once caught. The Complete Book of Sportfishing is one of the most comprehensive treatments of the

subject. It was compiled by a team of carefully chosen experts from several countries - devoted sportfisherman, well informed about the different conditions of water life, the species and methods that give sportfishing its unmatched scope and diversity. The photographs are by internationally known photographers, and the drawings - nearly all in full color - are specially designed for clarity. The Complete Book of Sportfishing is an essential handbook for every enthusiast. It is a handy reference work for learning more about regional fish and, at the same time, it provides an introduction to new fishing habitats. Here is unique source of inspiration for new rod-and-reel adventures in both known and unknown waters.
