I read through it, left a couple of Post-It notes and put it on the shelf. 0 of 0 people found the following review helpful. Luster Glaze Resource By Maria Rode Great book for anyone working on the chemistry and firing of luster glazes. Clearly written the book includes basic formulas for lusters, firing schedules and kiln atmospheres.

A practical manual on creating lustres, including smoked and vapoured, liquid gold, platinum and coloured. In addition, a special section on high-fired feldspathic glazes is included. The book contains tips, recipes, advice and illustrations of work by master potters such as William de Morgan.
