Lucious illustrations, well organizedBy oregonrllI saw this book in the library and I loved it so much that I ordered a used one. I love it because it is one of the most logical books out there for people who like to grow cutting gardens. It shows you all the individual flowers to grow to make the bouquets or arrangements shown. The book I ordered was in mint condition and cost me around 5.00 with shipping. Amazing deal and amazing informative book for all skills of gardeners.2 of 2 people found the following review helpful. Sarah Raven's Cutting GardenBy J. WilliamsLove the book, and though I haven't read far into it yet, I am finding a lot of valuable information in the first pages! Know I will find it a great resource. Thank you.

...the book's strongest suit is the abundance of detailed instruction on creating a variety of arrangements, using casual

materials like kitchen pitchers, small glass bottles, or bowls to display freshly picked and naturally grouped compositions of flowers, foliage, fruit, twigs, and berries.

From Library Journal In this extremely beautiful and practical book, Raven, a British "flower arranger to the rich and famous," presents gorgeous color photos of her own cutting garden in Sussex. Personal, clear, well organized, and direct in her writing style, she begins with tips for laying out a cutting garden to provide flowers throughout the year and goes on to discuss cultivation, cutting, conditioning, and basic arranging principles. She then suggests truly stunning flower arrangements for each season, indicating instructions, equipment, plants, and methods for each. The final section is a catalog of the author's favorite cutting flowers and foliage arranged by season and color, including illustrations to scale and conditioning and cultivation requirements. This book, which provides a wealth of information and inspiration, is unlike any other the reviewer has seen. While the flower selections are suitable to northern zones, the principles can be adapted by gardeners in all climates. Highly recommended. ?Carol Cubberley, Univ. of Southern Mississippi, Hattiesburg Copyright 1997 Reed Business Information, Inc.
